Bark discs with photo

Instructions No. 1670

Difficulty: Beginner

Working time: 30 Minutes

Why not transfer your photos onto slices of bark.. so you get great gifts or pendants for yourself or your loved ones! Try it out right away, it is very easy.

Select the images or photos you want to transfer. Now print them out mirror-inverted with a laser printer.

Spread the **transfer medium** thickly on the **bark slices** and place the printout of your photo with the printed side down on the surface you have previously coated. Afterwards, paint the transfer medium on your photo again and let everything dry thoroughly.

Then moisten the photo **well** with a sponge. Gently stroke over your photo until Paper is rubbed off and only has your photo left. A soft sponge or your fingers are best suited for this.

For protection, spray your photo with a matt varnish . This way you can enjoy your work of art for a long time

Tip: Of course you can also design small slices of bark and provide them with small photos. Then drill a small hole in it and provide these with a nice Ribbon - and you have beautiful individual gift tags for your Christmas gifts or birthday presents.

Must Have

Photo Transfer Potch, 150 ml

Fill volume: 150 ml

31,59 zł (1 l = 210,60 zł)
