Casting design with coloured raysin

Instructions No. 1593

Difficulty: Beginner

Working time: 2 Hours

Pour your world as colourful as you like - with the casting powder Raysin and colour pigments!
With the dyeable ultra-white casting compound Raysin you can easily add a little variety to your casting technique

All you need is: Raysin, your chosen colours from the colour pigments, your desired casting mould and you are ready to start!

Mix the **Raysin powder** with water according to the instructions to a creamy mass and add **a few drops Colour Concentrate** Stir well! Then you can pour the colourful mass into the mould. After approx. 30 minutes you can already remove your work of art from the mould. Then please let it dry well.

If you wish a **two-coloured design, colour** the mass in your desired colour. Then add a few drops of Colour Concentrate and carefully lift this only under the mass. Now you can put the dyed raysin into the form. This creates beautiful marbling effects **.**

The white casting powder Raysin is very easy to **use and** absolutely harmless **.** With Raysin, great creations can be realized. Casting moulds make work easier and so the subject is interesting for **children, beginners and professionals alike**. Due to the short waiting time they can quickly admire your result.
