Back to school ideas

Instructions No. 1630

Difficulty: Advanced

Working time: 45 Minutes

Starting school is something very special. Thanks to our **great handicraft ideas**, the **schoolchild** can call very special handicrafts their own. Some of them also help with organising, keeping track of things and much more.

Pencil Garland

Cut 19 x 7 cm strips from **colourful photo cardboard**. For our lettering you will need 15 photo cardboard strips.

To design the **pencil tips** , cut 4 x 7 cm strips from a beige photo carton and glue them onto the coloured strips with 0.5 cm spacing. Now cut a tip from the beige-coloured Paper . This creates the pen look.

When all the "pens" have been cut to size, blackboard foil labels are **applied**

Spray the **letters with** paint spray **.** After drying, these are stuck onto the labels with Handicraft glue .

Punch 2 holes in each pin with a **hole puncher** . Now pull the Satin ribbon through and knot a loop at each end.

Make a timetable

The self-designed **timetable** is just the right thing for your **school child.** It can even be understood without reading. **Comprehensible pictures** show the child which **lessons are scheduled** .

Coat a **glued wood panel** with **Magnetic paint** and let them dry well. Repeat this procedure five times.
Then apply three layers one after the other **Board paint** onto the glued wood panel. In between always let the Board paint dry.
For the name of the schoolchild, draw the **letters of** his name with **Handicraft paint** in your desired colours. For the other decorations, such as the monsters, cut **the** desired motifs from the scrapbooking block

With white board chalk you paint a **hour slice on** the dried board. From the **notepad** you take six pieces of paper in different colours. Draw a **clock** on one note and cut it out, cut the remaining notes to size so that they fit into the grid of the timetable. Add the **times of the lessons** to the notes.

Use **coloured chalk** to enter the **days of the week** in the grid at the top.

Now the **school subjects** are created **as magnets**. Draw symbols for the respective school subjects with Aquarelle crayons and fineliners **Wooden discs**. In our example, we have drawn music and musical notes for the subject

music, we have used numbers for arithmetic and math, different religious symbols for religion, a brush with splashes of paint for art, a globe for expertise and a runner for sport. There are no limits to your imagination. Your child will understand the timetable without being able to read it himself.
Finally, glue **magnets** with **Handicraft glue** behind the Wooden discs, notepads, monsters and letters. After drying, you can attach everything to the timetable.

Extra tips

Tip 1: Do you want to hang the timetable on the wall? Simply staple Jute ribbon to the back of the wall and you can easily hang the timetable up.
Tip 2: Would you like to hang your child's timetable on the refrigerator? Then simply use our Blackboard film instead of the plate! You can attach it to your refrigerator with magnets.

Design practical magazine racks

We have our **standing collectors** quite simply with **Handicraft paint** painted. In our example we painted one with azure blue and the other with may green. The edges of the standing collectors you paint in each case with the other color
Now you can paint motifs from the **Scrapbook block** remove, cut and label. With Handicraft glue onto the standing collectors

There they are, the **geniuses of organization**!

Create colourful Note box

Glue coloured **wooden spatulas** (height 11 cm) with **wood glue** around the **Note box**. After drying, fill the box with **notepads** .

Folder for labelling

This fancy **folder** is designed super **fast**

Simply glue **Blackboard film** on your binder. Afterwards you can design it with chalk as you like.

Must Have

VBS Board paint, 100 ml, Green

Fill volume: 100 ml

20,99 zł (1 l = 209,90 zł)
