Candle gel beginner set

Instructions No. 2411

Difficulty: Beginner

Working time: 2 Hours 30 Minutes

Pouring candles brings creativity and fun for the whole family. With our practical candle gel beginner's set, you can easily cast beautiful gel candles. In addition to the set, you will need tea light glasses and decorative pieces such as shells or stones if desired.

Pour candles:

1. Slowly melt the candle gel in a melting pot. If desired, candle gel tinting colour can now be added. Mix everything together well.

2. Add a few drops of candle fragrance oil to the liquid candle gel.

3. If desired, place shells, muggle stones or other decorative pieces in the tea light jars and pour in the candle gel.

4. Once the gel has dried a little, a wick can be placed in the centre.
