With our step-by-step instructions, you can create **impressive cards with enchanting wire wreaths** that are guaranteed to wow. Handmade cards not only exude only creativity, but also warmth - perfect for pausing and sharing personal messages during the hectic Christmas season.

Discover the magic of handmade christmas cards with unique wire wreaths

Preparing the paper

From the wide range of origami paper colors, choose the one that suits you best and cut the Paper with a cutter so that it is slightly smaller than the card itself. Then round off the corners of the paper with the VBS Round the corners. This small adjustment gives the card a professional and soft look. Use VBS handicraft glue No. 182 to glue the Paper evenly onto the double card. Make sure that no glue oozes out of the sides.

Shaping the wire wreath

Carefully remove the wire from the packaging and loosen the ribbons holding it together. Gently pull the wire apart. think about how many circles you want your wreath to have - this will give your card the right amount of festivity. Cut the wire with the side cutter, which is a special tool designed specifically for easy wire cutting. Thread a star onto one end of the wire and fix it in place with a little handicraft glue. Once the glue has dried, you can string more stars onto the wire to complete your wreath.

Fastening and decorating the wreath

Cover the lower part of the wire and the stars with handicraft glue and place the wreath in the desired position on your card. To hold the wreath in place while it dries Position you can place the card package on top as a weight. This method ensures that the wreath stays in place without you having to press it down.

Stamping personal messages

Now you can use the VBS Stamp Christmas messages on the origami-Paper using the silicone stamps. Design your words to reflect the feelings and greetings you want to share. Cut the stamped messages to the desired size and stick them onto the card. This personal touch will make your card extra special.

Cleaning tips

Finally, clean your stamps thoroughly with stamp cleaner. This will prevent ink from drying out and preserve the longevity of your stamps for future projects.
