# Decorative wooden sign

**Instructions No. 1752**

Difficulty: Beginner

Working time: 30 Minutes

Are you looking for a spring-like decoration? In this guide we show you how to create this beautiful wall decoration with only little effort and material.

## This is how it is done

First of all the decorative wooden plate is decorated with **VBS Handicraft paint** in Apricot primed

**Tip:** Carry the colour with a **Paint sponge** on. This allows the paint to be distributed more evenly and no brush strokes are visible at the end

After the paint has dried, the wooden board is coated with **Chalky Wax**, which serves as a separating layer between two colours. The drying time is about 15 **minutes**. The drying process can be slightly accelerated with the help of a hairdryer. Then apply Chalky **Color in** antique white. For the shabby **look**, simply apply the dried colour carefully with **Sandpaper** grind down.

Afterwards the lettering is sanded with **VBS Handicraft paint** in the colours and Mint painted

After drying, the lettering can be placed in the middle of a wooden plate and fixed with some hot glue

Finally, decorate with spring-like sprinkles as desired.

## Must Have

## VBS Decorative wood panel

Length: 29 cm
Depth: 1.5 cm
Width: 29 cm
Thickness: 0.7 cm
Material: Pine wood

**31,59 zł**
