# Easter Tealight Holders and Egg Cups

**Instructions No. 2114**

Difficulty: Beginner

Working time: 1 hour

The table decoration for Easter invites you to get creative. In this instruction we have two ideas for you: a tea light holder and egg cups made of wood for the Easter table. With Easter motifs, they become a great eye-catcher on the table.

Apply wood stain to the recess and let it dry. If you wish, you can also paint the rest of the wood with craft paint diluted in water.
Print out the free motif template and transfer it to the tealight holders using graphite paper. Connect the branding pen to the electricity. As soon as it has reached the right temperature, you can slowly trace the motifs on the wood with a narrow tip.
Now either place a tea light jar in the recess provided or glue a wooden ring around the recess with craft glue so that they can serve as egg cups.
