Embroidery Ring Christmas Design

Instructions No. 2876

Difficulty: Beginner

Working time: 1 hour 30 Minutes

Are you still looking for an idea to get in the mood for Christmas with homemade decorations? Then we have just the thing for you! With our Christmas embroidery rings you can get in the mood for the upcoming Christmas season.

Decorate with print ribbons

First, the ribbons are cut to fit the inner ring from the outside, starting at the bottom, and glued on slightly overlapping. If necessary, the protruding ends can be shortened and glued to the side of the ring. This will make your project look neat and professional.

Next, repeat this step on the back of the ring so that your work of art is a real eye-catcher from all sides. Make sure that the ribbons are taut. How tight you tighten the ribbons is up to you.

Now attach the outer ring. It serves as a frame for your artwork, gives it stability and covers the ends of the ribbons and the glue.

Bring to life with branches

You can now insert the stems and twigs into the resulting "pocket". You can either attach them to the ring or to the inside of the pocket with a little hot glue. This will keep them in place and prevent them from slipping.

Finally, attach the cord, which is used for hanging, to the top of the embroidery ring. Now you can hang up and display your finished work of art.

With these steps, your project will not only look only beautiful, but will also be stable and ready to be presented as a pretty Christmas decoration.
