Felted tealight glasses

Instructions No. 2035

Difficulty: Beginner

Working time: 1 hour 30 Minutes

Our idea with the **tea light glasses** looks cuddly and gives off a beautiful light. This decoration is not only something for the winter time, but also nice to look at on the terrace or balcony. With a few simple steps and a bit of skill, these great light sources are easily made.

This is how the cozy glasses are made:

Cut off a little of the two colours of **fairy tale wool** and place them on top of each other so that they meet in the middle and lie a little on top of each other. The amount of colours should be about the same. Now use the felting needle to felt the wool on the mat. This creates a felted plate

Mix the **Mega Filzer** with water according to the instructions. Now brush the fairy tale wool with the mixture (best in a small tub or bowl). Turn yours felt mat over and also brush it on the back. Now use the felt mat "Special" for a different purpose by brushing with the mat from the middle to the bottom or if necessary on top. This will give you a nicer colour transition

Rinse the **felt mat** with clear water and wring out the water by pressing lightly. To get even more water out of it Felt, rub it against the burl foil. Now you suck up the water on both sides with a cloth. Then blow dry all finished mats. Fix the mats with double-sided Adhesive tape to the **tea light glasses**. Simply cut off the protruding ends with scissors.
