This technique gives your project a colorful and individual design that will turn heads. Whether you are an experienced crafter or a beginner, these instructions will help you to achieve an impressive result.

Step-by-step instructions: Adorable bunny with Décopatch

Prepare the template

First, print out the template and cut it out carefully. This serves as the basis for your bunny and ensures that all parts are the right size.

Knead and roll out the polymer clay air

Now take some Fimo Air and knead it until it is soft and smooth. Fimo Air is an air-drying modelling clay, that is easy to work with. Roll out the mixture on a surface until it is about 1 cm thick.

Cutting out the shapes

Place template A on the rolled-out polymer clay. Cut out the shape with a scalpel. Repeat this step twice to get all the parts you need. The scalpel ensures precise cuts, so be careful.

remove excess mass

Remove the excess polymer clay and pack it in an airtight container so that it does not dry out and can be used for future projects.

Smooth the edges and shape the ears

Carefully smooth the edges of the cut-out shapes with your finger to avoid sharp edges. Shape the ears as desired to give your bunny personality. Leave the ears to air dry completely for approx. 24 hours.
