Foil lamps as a light chain

Instructions No. 1472

The small foil lamps with the light chain are a great **garden decoration.** They do not look only beautiful, but at the same time they are a welcome **illumination for the garden path and terrace.**

Each **lamp** consists of 30 foil parts. All parts are sprayed with spray adhesive and applied to a selected motif**Straw silk paper** glued. Then cut out all parts and carefully paint them again with Napkin glue (also the edges).
After drying, all parts are put together using the product instructions (supplied with the foil lamp)

Decorate the bottom of the lamp balls with satin ribbons, insert a light chain, fix it with some wire. Other satin ribbons on the light chain are also very decorative. These can also be decorated with feather diffusers. Finally, wrap an ivy garland around the fairy lights, thereby concealing the cable of the fairy lights so that they will not be noticed in the decoration idea
