

Glowing wooden stars

Instructions No. 1687

Difficulty: Beginner 🍴🍴🍴🍴

This Christmas DIY light is made within a short time. The decorative stars certainly fit into every home.

Craft idea for impatient people

First use the outer contours of the wooden stars as a template to cut the star foil. Cut the Lace of the foil stars, remove narrow triangles. Place the film in the stars and use a folding leg or scissors to draw a seam in the film. Before gluing it in, prime the wooden stars with VBS Chalky Color paint in antique green and Stone Grey.

After drying, the star foil is glued in with double-sided Adhesive tape , into the inside of each star a Fairy lights fixed. Arrange the stars together with some fir green and Christmas Balls in your home.

Must Have

VBS Wooden stars "Frame"
