Instructions: Create your own colourful wooden eggs for Easter bouquets

Instructions No. 1128

Difficulty: Beginner

Easter is egg time again. With this handicraft idea we show you how to make colourful good mood pendants from simple wooden eggs. This is also a good opportunity to put all your favorite-Embellishment, bows and ribbons.

And it is as simple as that:

How do I make the colourful Easter eggs?

Take the six MDF eggs and glue the self-adhesive fabric over them. Cut off the excess with a pair of scissors. Tie colourful little bows from the satin ribbons and glue them to the eggs with hot glue. Then thread the natural bast through the decorative buttons and knot a small bow from each end. Place the buttons under the satin bows with hot glue.

Then take different Embellishment and stick them in any arrangement on the egg tags. Finally, thread only and Yarn through each hole on the eggs and you can hang up your homemade Easter decoration.
