Instructions: Easter crafting with wooden decorative bunnies

Instructions No. 3700

Difficulty: Beginner

Your Easter decoration is not yet complete? How about our decorative bunnies made of MDF wood? The bunnies can be easily assembled and then painted or glued. In this instruction you get fabrics ironed on and painted in Easter colors.

And it's that easy:

How do I go about designing the decorative bunnies?
First prime the individual parts of the bunnies with brown Acrylic paint and then let them dry.

How do I apply the fabric to the rabbits?
Now take the different fabrics for a dress, trousers and cuffs from the fabric set and place them on the bunnies. Place an iron-on foil on top of them and iron everything on briefly. Then you can cut out the outlines.

How do I paint the decorative bunnies?
Take black and white Acrylic paint and paint the faces, ears and paws of the rabbits. Lightly smudge the white colour with a sponge. Paint the remaining hearts and egg motifs with yellow, red, green, pink and orange Acrylic paint , as shown in the deco picture.

Then paint a shirt on the one rabbit with blue and white Acrylic paint . Then you can cut out a flower and a shirt collar from the ironing fabric and iron them on as well.

Finally, put the individual parts together and glue them together with hot glue.

Tip: Place the pair of rabbits as a cheerful welcoming committee in your entrance or living area.
