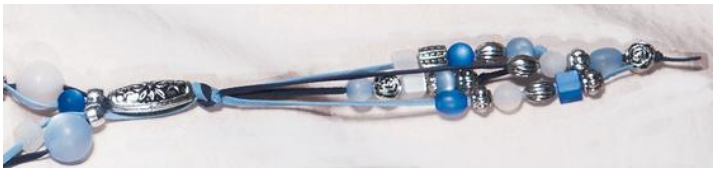
Kette aus gefrosteten Perlen

Instructions No. 476

Difficulty: Beginner

Fashionable pearl necklaces can be **made** with frosted pearls and leather cord very quickly! So you always have jewellery that harmonises perfectly with your clothes!



This is how you design your personal pearl necklace:

Take two coloured **imitation leather bands of** the desired length and thread the ends of the cords through a Metallic-Pearl. Now thread two beads **from** the "Bead set, frosted" and connect the two ribbons by inserting a small Metallic-Pearl thread. This creates the loose distance between the beads without them slipping. Repeat this step until you have threaded approx. ¾ of Chain .

Now the ends of the strings are connected by a large Metallic-Pearl and knotted. Thread beads as you like on the individual ribbons and close them by making a knot at the end of each one.
