Miniature workshop

Instructions No. 2933

Difficulty: Beginner

Working time: 6 Hours

Well, who left their creative chaos in the workshop? It must have been a little secret santa.
With our craft instructions, you can create a little Secret Santa door with a miniature workshop in no time at all. A great idea for the Christmas season for young and old!

First cut the **wooden spatulas** and **craft sticks** with scissors and glue them together to form a workbench, door and window with **handicraft glue** together.

Once the glue has dried, you can decorate the Secret Santa door, workbench and window with **craft paints**. Leave to dry. Glue behind the window and the door window **lamp foil**.

Cut some **steel pins** with a side cutter and glue them to the workbench to hang it up.

Decorate the workbench with more **miniatures** and arrange everything into a miniature scene.
