Mobilé with sea animals from acrylic moulds

Instructions No. 2728

Difficulty: Beginner

Working time: 6 Hours

Bring a beautiful underwater world home with our **sea animal mobilé**. It is easy to recreate and can be made individually according to your wishes. By using our template and gluing on straw silk, different **acrylic shapes** can be easily transformed into the fish.

This is how the great mobilé is created:

First carefully remove the hanging eyes from the desired **acrylic shapes** with a side cutter.

Tear **straw silk** into small pieces and glue them into the acrylic halves from the inside with napkin varnish. Allow to dry.

Download the **templates**, cut out the motifs and transfer them to the straw silk. Cut out the fins and tails.

Cut the bamboo skewers into pieces about 2 cm long and knot a piece of sewing thread in the middle. Place the sewing thread end in one half of the acrylic mould, place a tail fin on the edge if desired and close tightly with the other half. Glue the wiggly eyes and fins on with a little craft glue.

Cut two approx. 60 cm long ribbons from the jute cord. Knot the four ends of the cord to the ring of wooden beads. Also attach the fish to the wooden bead ring with the cord.
