Motifs made from crepe paper balls

Instructions No. 2966

Difficulty: Beginner

Working time: 2 Hours

These pictures, which are covered with **crêpepaper balls**, look cute, are a **great activity for children** and also promote concentration and motor skills. Great handicraft lessons are pre-programmed and the result can be used as a window picture or you can stick a stick to the back of the figures - and they are already great plugs!

This is how the pictures are made:

Print out the **templates** and transfer them with graphite paper onto the **craft cardboard sheet** with graphite paper. Then cut out the motifs. Tear the **crêpepaper** into small pieces and roll into small balls. Gradually coat the areas to be covered with VBS **handicraft glue** and stick the "dumplings" onto them. Depending on your preference or stamina, the figures can be completely or only partially glued on.

Glue the wobbly eyes with VBS handicraft glue glue on. Draw on the nose and mouth with a black pen.

For the antennae, bend a **chenille wire** in the middle. Roll up the two ends. Glue the bent end to the back of the craft cardboard sheet .
