Snowman candle

Instructions No. 2581

Difficulty: Beginner

Working time: 1 hour

When the days get shorter and it gets darker outside, it's all the nicer to light a **home-made candle**. Our homemade candle is very easy to make. You pour the candles and then decorate them in the style of a **snowman**.

Decorative candle made easy:

First measure the **wax**. To do this, use the **lantern glasses** as a measuring aid. Fill approx. 1.5 lantern glasses with organic wax and melt them in the melting pot. Then add two candle drops to the pot and melt them too.

Place a **candle wick** in the lantern jar. It is best to fix it at the bottom with hot glue. Place a skewer on the lantern so that the wick is centred. Now pour the melted wax into the glass. Leave to cool.

Once the candle is solid, decorate the glass. To do this, glue the **decorative ribbon** to the top of the rim, where the beginning and end of the ribbon meet, with **craft glue**. Glue another piece of folded decorative ribbon in the same place. Finally, paint the **buttons** with a black **pen** and glue them on.
