Stones with miniature landscape

Instructions No. 2041

Difficulty: Advanced

Working time: 2 Hours

During the winter time all the houses and apartments are beautifully decorated. Our **miniature landscapes on stones** are a very special highlight. On the small self-cast stones you can build cute figures and landscapes and additionally decorate them with fairy lights.

Stones with skiers, snowboarders and sledgers:

Mix about 10 tablespoons of raysin **with** water according to the package instructions to a creamy mixture. Pour this into the **mould.** After about 3 hours drying time the stones can be removed from the mould

Using a plastic spatula, brush the stones with decorative snow and place the miniatures on top. Allow to dry.

Stones with miniature landscapes (deer, Santa Claus and polar bears):

Mix about 10 tablespoons of raysin **with** water according to the package instructions to a creamy mixture. Pour this into the mould. Press a placeholder for the light chain to be decorated later into the bottom of the stone mould, e.g. a maxi tea light. After about 3 hours drying time the stones can be removed from the mould. Carefully remove the placeholder and glue the LED light chain battery compartment inside. Make sure that the side that can be opened is at the top for changing batteries

Using a plastic spatula, brush the stones with **decorative snow** and place the **miniatures** and **firs** on top. Then sprinkle white glitter over them. When the decorative snow is dry, you can wrap the wire of the fairy lights around the firs. You can then cover the connection of Fir to Fir again with decorative snow. If the chain of lights is too long for you, you can shorten it with scissors

In the case of the **polar bears VBS Handicraft paint** Ice blue Water.

Must Have

Casting mould "Three stones"

Number of motifs: 3
Fill volume: 400 ml
Length: 23.5 cm
Width: 18.5 cm
Material: Polyethylene (PE)

36,79 zł
