

# Stretcher frame "Sea world"

Instructions No. 2263

Difficulty: Advanced 🍴🍴🍴🍴

Working time: 4 Hours

This mural is timelessly beautiful. With 3D effects, color and shells creates on a stretcher a sea world to dream away.

## First spackle and glue...

Use a spatula to model small 3D waves on the stretcher frame with the coarse texture paste, and further sea structure with the light texture paste. Glue shells and decorative elements to the stretcher with hot glue.

## ...then paint...

Now prime the entire stretcher with primary blue paint. Paint the picture with shades in lighter shades of blue. Also design the side parts of the picture.

To give the picture visual depth, paint the areas around the shells and decorative elements with darker blue. To do this, mix the primary blue color with a little black.

## ... and stencil!

After the paint has dried well spray the back of the stencils with some adhesive spray, position them on the stretcher. Put some light blue paint on a dry stippling brush, stipple it on the motifs of the stencil.

Once the motif stencil is removed and cleaned, the paint dried, stencil a second layer of silver paint. This only gives your "sea world" that certain something.

## Must Have

VBS Stretched canvas 30 x 40 cm
